Edición: 1^a

Sinopsis

ISBN: 9780486671642

Well-organized text designed to complement graduate-level physics texts in classical mechanics, electricity, magnetism, and quantum mechanics. Topics include theory of vector spaces, analytic function theory, Green's function method of solving differential and partial differential equations, theory of groups, more. Many problems, suggestions for further reading.

A republication in one volume of the two-volume Addison-Wesley edition of 1969-70, this textbook is designed to complement graduate-level physics texts in classical mechanics, electricity, magnetism, and quantum mechanics.
