Sinopsis

ISBN: 1584885238

The latest edition in this best-selling series, MATLAB® Primer, Seventh Edition incorporates a number of enhancements such as changes to the desktop, new features for developing M-files, the JIT accelerator, and an easier way of importing Java classes. In addition to the features new to version 7.0, this book includes a new section on M-Lint (the new debugger for M-files), a new chapter on calling Java from MATLAB and using Java objects inside the MATLAB workspace, a new chapter on calling Fortran from MATLAB, a new chapter on solving symbolic and numeric polynomials, nonlinear equations, and differential equations, and a new chapter on cell publishing, which replaces the "notebook" feature.
