Sinopsis

ISBN: 1405136669

The fourth edition brings this material totally up-to-date, and includes new end-of-chapter problems and classroom games, a math appendix, and is accompanied by a comprehensive website featuring solutions to problems and teaching notes. With its emphasis on applications of game theory and information economics to a vast array of disciplines, Games and Information, 4e will prove an indispensable tool for undergraduates studying advanced microeconomics as well as for graduate students in economics, business, mathematics and political science.
