Título: Nonlinear Analysis And Semilinear Elliptic Problems

Autor: Ambrosetti, Antonio

Precio: \$2100.00

Editorial:

Año: 2007

Tema:

Edición: 1^a

Sinopsis

ISBN: 0521863201

Many problems in science and engineering are described by nonlinear differential equations, which can be notoriously difficult to solve. Through the interplay of topological and variational ideas, methods of nonlinear analysis are able to tackle such fundamental problems. This graduate text explains some of the key techniques in a way that will be appreciated by mathematicians, physicists and engineers.
