Sinopsis

ISBN: 9780300103373

This latest volume in the critically acclaimed Clark Studies in the Visual Arts series examines the force of art history's attraction to particular objects and the corresponding rhythms of attachment and detachment that animate the discipline. In a series of thought-provoking essays, distinguished curators, conservators, and scholars from various disciplines within the humanities consider how artists, the public, and art historians have encountered objects in periods ranging from the Renaissance to Surrealism and contemporary art.
