**Título:** Computer Networking: A Top-Down Approach

**Autor:** Kurose / Ross                    **Precio:** $715.00

**Editorial:**                              **Año:** 2008

**Tema:**                                   **Edición:** 4ª

**Sinopsis**                                **ISBN:** 9780321497703

Building on the successful top-down approach of previous editions, the Fourth Edition of Computer Networking continues with an early emphasis on application-layer paradigms and application programming interfaces, encouraging a hands-on experience with protocols and networking concepts. With this edition, Kurose and Ross bring the issues of network security to the forefront and integrate the most current and relevant networking technologies.

Networking today involves much more than standards specifying message formats and protocol behaviors-and it is far more interesting. Professors Kurose and Ross focus on describing emerging principles in a lively and engaging manner and then illustrate these principles with examples drawn from Internet architecture.
