Título: Corrosion And Surface Chemistry Of Metals

Autor: Landolt Dieter

Precio: \$1485.00

Editorial:

Año: 2006

Tema:

Edición: 1^a

Sinopsis

ISBN: 9780849382338

Providing a carefully developed and comprehensive overview of the corrosion chemistry of metallic materials, this book covers the principal methods of corrosion prevention. It includes a systematic study of the physical chemistry of the surface supported by state-of-the-art analysis methods. The author builds a scientific foundation by developing thermodynamics and kinetics of electrode-electrolyte interaction and other surface processes. This allows him to analyze and derive the models that are used in the study of corrosion for metals and their alloys, including electrochemical attack, high-temperature oxidation, passivity, atmospheric corrosion, as well as the roles of wear and strain.
