Edición: 1ª

Sinopsis

ISBN: 9789264033115

The book examines the costs and benefits of migration for developing countries and how these flows can be better organised to yield greater benefits for all parties concerned -- migrant-sending countries, migrant-receiving countries, and the migrants themselves. It takes stock of what we know about the effects of migration on development, and distills from that knowledge a set of policy recommendations for sending and receiving countries alike. It draws on a large number of country and regional case studies co-ordinated by the OECD Development Centre to illustrate the mechanisms that link migration and development: labour-market effects, brain drain, remittances, diaspora networks and return migration.

Table of Content :

Preface
Executive Summary
Introduction and Overview
