Edición: 1ª

Sinopsis

ISBN: 9780132385626

Offering broad coverage of all major scheduling subjects, this book is a comprehensive resource designed for construction management, planning and scheduling. It follows a logical progression, introducing precedence diagramming early and following with chapters on activity durations, resource allocations, network schedules and more. It reflects current trends in scheduling (short-interval scheduling, computer scheduling, linear scheduling etc.) and includes chapters on arrow diagramming and PERT. With an eye on application, it includes a unique discussion of contract provisions related to scheduling and incorporates a sample project throughout. Serves as an excellent resource for scheduling professionals in construction and related business sectors, as well as construction attorneys.
