Título: Structural Identification Of Organic Compounds With Spectroscopic Techniques

Autor: Ning Yong-Cheng

Precio: \$1160.00

Editorial:

Año: 2005

Tema:

Edición: 1^a

Sinopsis

ISBN: 9783527312405

Organic spectroscopy bridges both physics and chemistry, but Ning (chemistry, Tsinghua U., Beijing) finds that books by physicists are hard for chemists to understand, and those by chemists neglect the physical basis of the technology. So he offers a text that includes both, using simple terms for the physics that are comprehensible to graduate students and researchers in chemistry. Both of the two editions of the Chinese original from which this is translated won awards as teaching material.
