Título: Encyclopedia Of Artificial Intelligence. 3 Vols

Autor: Rabuñal Dopico Juan Ramon/ Dorado de la Calle Julian/ Pazo **Precio:** \$13993.00

Editorial: **Año:** 2009

Tema: **Edición:** 1ª

Sinopsis **ISBN:** 9781599048499

Numerous real-life problems so complex as to be virtually insoluble by means of traditional computer science techniques can now be approached effectively with artificial intelligence techniques. Recently, artificial intelligence technologies have evolved at a rapid pace, raising significant challenges to the effort to stay current.

The Encyclopedia of Artificial Intelligence is a comprehensive and in-depth reference to the most recent developments in the field covering theoretical developments, techniques, technologies, and applications of systems using intelligent characteristics for adaptability, automation learning, classification, prediction, and even artistic creation, among others. Authored by over 400 of the world's leading experts from more than 40 countries, this commanding reference of 237 articles is essential to any research library's technology holdings.
