**Título:** Computational Methods For Protein Structure Prediction  
And Modeling

**Autor:** Ying X, Dong Xu And Jie Liang

**Precio:** \$2305.50

**Editorial:**

**Año:** 2007

**Tema:**

**Edición:** 20ª

**Sinopsis**

**ISBN:** 9780387333212

Volume two of this two volume sequence focuses on protein structure prediction and includes protein threading, De novo methods, applications to membrane proteins and protein complexes, structure-based drug design, as well as structure prediction as a systems problem. A series of appendices review the biological and chemical basics related to protein structure, computer science for structural informatics, and prerequisite mathematics and statistics.

Key Features

Presents a comprehensive overview of protein structure prediction methods

Each chapter is a self contained review

Coverage includes De novo methods of protein structure prediction, applications to membrane proteins and protein complexes and more

2nd volume of a two-volume sequence
