**Sinopsis**

**ISBN:** 9781420067361

Taking an application-oriented approach, these exercises encourage students to apply rigorous analyses to collected data, and provide results through formal professional reports. The book contains nearly three dozen exercises covering workplace environment, work analysis, information processing, physiological issues, and systems evaluations. Some are pencil and paper exercises, some are stopwatch studies, some require special laboratory equipment, and others are field exercises. The book gives technical background on each topic and provides equipment needs, experimental design, and data sheets, as well as guidance on analysis and detailed instructions on report writing.
