Título: Chemistry Of Nanostructured Materials, The.

Autor: Yang, Peidong

Precio: \$980.00

Editorial:

Año: 2003

Tema:

Edición: 1^a

Sinopsis

ISBN: 9789812385659

This important book reviews extensively the preparative chemistry of various nanostructured materials, as well as structural-property correlations for these new materials. Materials of current interest, such as nanocrystals, nanowires, nanotubes, porous materials, and composites, are comprehensively covered.

Contents:

Crystalline Microporous and Open Framework Materials (X-H Bu & P-Y Feng)

Mesoporous Materials (A Sayari)

Macroporous Materials Containing Three-Dimensionally Periodic Structures (Y-N Xia et al.)

CVD Synthesis of Single-Walled Carbon Nanotubes (B Zheng & J Liu)

Nanocrystals (M P Pileni)

Inorganic Fullerene-Like Structures and Inorganic Nanotubes from 2-D Layered Compounds (R Tenne)

Semiconductor Nanowires: Functional Building Blocks for Nanotechnology (H-Q Yan & P-D Yang)

Harnessing Synthetic Versatility Toward Intelligent Interfacial Design: Organic Functionalization of Nanostructured Silicon Surfaces (L A Porter & J M Buriak)

Molecular Networks as Novel Materials (W-B Lin & H L Ngo)

Molecular Cluster Magnets (J R Long)

Block Copolymers in Nanotechnology (N P Balsara & H Hahn)

The Expanding World of Nanoparticle and Nanoporous Catalysts (R Raja & J M Thomas)

Nanocomposites (W Caseri)
