Título: Fault-Tolerant Control Systems

Autor: Noura Hassan And Theilliol Didier **Precio:** \$1870.50

Editorial: Año: 2009

Tema: Edición: 1ª

Sinopsis ISBN: 9781848826526

Fault-tolerant Control Systems reports the development of fault diagnosis and fault-tolerant control (FTC) methods with their application to real plants. After an introduction to fault diagnosis and FTC, a chapter on actuators and sensors in systems with varying degrees of nonlinearity leads to three chapters in which the design of FTC systems is given thorough coverage for real applications:

a winding machine typifying a subsystem in various sheet and film processes;

a hydraulic three-tank system representative of those used widely in chemical plants; and

an active suspension system demonstrating application in whole large-scale systems by splitting into subsystems.
