CCNP Quick Reference

A quick review of CCNP exam topics

Denise Donohue, CCIE® No. 9566

Brent Stewart

Jerold Swan, CCIE No.17783

As a final exam preparation tool, the CCNP Quick Reference provides a concise review of all objectives on the four CCNP exams, including BSCI (642-901), BCMSN (642-812), ISCW (642-825) and ONT (642-845). This book provides you with detailed, graphical-based information, highlighting only the key topics in cram-style format. The easy-to-reference format and succinct presentation help you drill on key exam topics.

With this document as your guide, you will review topics on routing, switching, secure remote access networks, network security, and quality of service (QoS). This fact-filled Quick Reference allows you to get all-important information at a glance, helping you to focus your study on areas of weakness and to enhance memory retention of essential exam concepts.

CCNP Quick Reference is part of a recommended learning path from Cisco® that includes simulation and hands-on training from authorized Cisco Learning Partners and self-study products from Cisco Press. To find out more about instructor-led training, e-learning, and hands-on instruction offered by authorized Cisco Learning Partners worldwide, please visit www.cisco.com/go/authorizedtraining.

Denise Donohue, CCIE® No. 9566, is manager of Solutions Engineering for ePlus Technology in Maryland. Denise was a Cisco instructor and course director for Global Knowledge and did network consulting for many years.
