**Título:** Introduction To The Theory Of The Early Universe.  
Cosmological Perturbations And

**Autor:** Gorbunov, Dimitry S. ; Rubakov, Valery A.

**Precio:** \$2262.00

**Editorial:**

**Año:** 2011

**Tema:**

**Edición:** 1<sup>a</sup>

**Sinopsis**

**ISBN:** 9789814322225

This book accompanies another book by the same authors, Introduction to the Theory of the Early Universe: Hot Big Bang Theory and presents the theory of the evolution of density perturbations and relic gravity waves, theory of cosmological inflation and post-inflationary reheating. Written in a pedagogical style, the main chapters give a detailed account of the established theory, with derivation of formulas. Being self-contained, it is a useful textbook for advanced undergraduate students and graduate students. Essential materials from General Relativity, theory of Gaussian random fields and quantum field theory are collected in the appendices. The more advanced topics are approached similarly in a pedagogical way. These parts may serve as a detailed introduction to current research.

Contents:

Jeans Instability in Newtonian Gravity  
Cosmological Perturbations in General Relativity. Equations of Linearized Theory  
Evolution of Vector and Tensor Perturbations  
Scalar Perturbations: Single-Component Fluids  
Primordial Perturbations in Real Universe  
Scalar Perturbations Before Recombination  
Structure Formation  
Beyond Ideal Fluid Approximation  
Temperature of Cosmic Microwave Background  
CMB Polarization  
Drawbacks of the Hot Big Bang Theory. Inflation as Possible Way Out  
Inflation in Slow Roll Regime  
Generation of Cosmological Perturbations at Inflation  
Further Aspects of Inflationary Theory  
Preheating After Inflation  
Bouncing Universe
