Sinopsis

ISBN: 9780131594753

This valuable resource concentrates on the practical application of nutrition for the production of effective, high-producing commercial livestock. Designed as a resource book, it presents early coverage of nutrition and digestive physiology, a complete section on livestock feeds and chapters devoted to the management and feeding practices of a variety of domestic animals. The latest nutrition requirements, nutrition specifications and feeds composition tables are included. Offering an accessible approach, the book helps readers understand the effects that feeding and management of livestock have on livestock production systems, food safety and the environment.
