Edición: 1^a

Sinopsis

ISBN: 9780393733174

A companion to Understanding Green Building Guidelines, this primer explains green building products_what they are and how to choose them.

From eco-friendly sheetrock to sustainable paint finishes, the green building movement is gaining momentum. But with new products, manufacturers, and standards being introduced routinely, how are architects or designers to know what's best for their projects? This book summarizes what is available and the considerations for selecting sustainable materials.con
