Sinopsis

ISBN: 9781574001495

Offers current, comprehensive guidance related to all disorders of the hip with chapters on diagnosis, classification, and management of periprosthetic infection, including data from the recent Consensus Meeting on PJI. Contributions by more than 200 international experts make up the four sections devoted to: Foundations of THA; Joint Preservation; Primary THA; and Revision THA. This authoritative reference covers topics from non-arthroplasty management of hip conditions, such as arthroscopic and open management of femoracetabular impingement, management of Perthes disease in the adult, and surgical management of residual DDH, to revision topics including custom implants for pelvic discontinuity, allograft prosthetic composites for massive femoral defects, and so much more. **KEY FEATURES** Valuable pearls and pitfalls, suggested Readings, and case studies. Evidence-based, focused, consistent organization chapters. Richly illustrated with full-color figures, diagrams, and tables. Addresses non-replacement management of hip dysplasia. Includes joint preservation procedures such as hip arthroscopy, no-replacement management of hip dysplasia, and vascular necrosis
