Título: Latent Variable Models: An Introduction To Factor, Path, And Structural Equation

Autor: Loehlin, John

Precio: \$1407.00

Editorial:

Año: 2003

Tema:

Edición: 4ª

Sinopsis

ISBN: 9780805849103

This book introduces multiple-latent variable models by utilizing path diagrams to explain the underlying relationships in the models. This approach helps less mathematically inclined students grasp the underlying relationships between path analysis, factor analysis, and structural equation modeling more easily. A few sections of the book make use of elementary matrix algebra. An appendix on the topic is provided for those who need a review. The author maintains an informal style so as to increase the book's accessibility
