Sinopsis

ISBN: 0262050722

Failed or abandoned software development projects cost the U.S. economy alone billions of dollars a year. In *Software Development Failures*, Kweku Ewusi-Mensah offers an empirically grounded study that suggests why these failures happen and how they can be avoided. Case studies analyzed include the well-known Confirm travel industry reservation program, FoxMeyer's Delta, the IRS's Tax System Modernization, the Denver International Airport's Baggage Handling System, and CODIS.
