Sinopsis

ISBN: 0486669025

The field of partial differential equations is an extremely important component of modern mathematics.

Graduate-level exposition by noted Russian mathematician offers rigorous, transparent, highly readable coverage of classification of equations, hyperbolic equations, elliptic equations and parabolic equations. Wealth of commentary and insight invaluable for deepening understanding of problems considered in text. Translated from the Russian by A. Shenitzer.

Reprint of the Interscience Publishers, Inc., New York, 1954 edition.
