Sinopsis

ISBN: 9780618619160

The Ancestor's Tale takes us from our immediate human ancestors back through what he calls 'concestors,' those shared with the apes, monkeys and other mammals and other vertebrates and beyond to the dim and distant microbial beginnings of life some 4 billion years ago. It is a remarkable story which is still very much in the process of being uncovered. And, of course from a scientist of Dawkins stature and reputation we get an insider's knowledge of the most up-to-date science and many of those involved in the research.
