Edición: 2ª

Sinopsis

ISBN: 0781763398

The book provides more in-depth and detailed explanations for each dissection than any other lab manual, so that students can self-teach. It correlates surface anatomy to anatomical structures revealed in the dissections, which is important for clinical correlation. Every page is cross-referenced to the newest editions of Clemente's, Grant's, Netter's and Rohen's anatomy atlases.
