Edición: 1^a

Sinopsis

ISBN: 1405133813

With many expensive and complicated mathematics texts for students of economics on the market, Turkington's text provides an affordable and accessible alternative for those requiring an intermediate, semester-length text. Designed to demonstrate the essential mathematical concepts-comprehensively and economically-without re-teaching basic material or laboring over superfluous ideas, this text locates the necessary information in a practical economic context.
