**Título:** Multi-Objective Optimization In Computer Networks Using Metaheuristics

**Autor:** Donoso, Yezid

**Precio:** \$1400.00

**Editorial:**

**Año:** 2007

**Tema:**

**Edición:** 1<sup>a</sup>

**Sinopsis**

**ISBN:** 9780849380846

Metaheuristics are widely used to solve important practical combinatorial optimization problems. Many new multicast applications emerging from the Internet-such as TV over the Internet, radio over the Internet, and multipoint video streaming-require reduced bandwidth consumption, end-to-end delay, and packet loss ratio. It is necessary to design and provide for these kinds of applications as well as for the resources needed to function well.
