Título: Dynamics Of Mechanical Systems

Autor: Josephs / Huston

Precio: \$1680.00

Editorial:

Año: 2002

Tema:

Edición: 1^a

Sinopsis

ISBN: 9780849305931

Evolving from more than three decades of teaching upper-level engineering courses, Dynamics of Mechanical Systems enables readers to obtain and refine skills ranging from the ability to perform insightful hand analyses to developing algorithms for numerical/computer analyses. Focusing on the fundamental procedures behind dynamic analyses, the authors take a vector-oriented approach and lead readers methodically from simple concepts and systems through the analysis of complex robotic and bio-systems. Ultimately, this book prepares them to solve real-world problems and make future advances in mechanisms, manipulators, and robotics.
