Título: An Introduction To Three-Dimensional Climate Modeling

Autor: Washington / Parkinson

Precio: \$813.00

Editorial:

Año: 2005

Tema:

Edición: 1^a

Sinopsis

ISBN: 9781891389351

Most descriptions of climatic modeling assume readers to have a great deal of previous knowledge about atmospheric or ocean dynamics, but Washington (US National Center for Atmospheric Research) and Parkinson (US National Aeronautics and Space Administration) address readers in the atmospheric science, geography, geology, hydrology, oceanography, and ecology who may be only vaguely aware of climate models. They explain what the models are attempting to simulate, how they are constructed, what they have succeeded in simulating, and how they are being used for evaluation and prediction.
