Título: Theory Of Itinerant Electron Magnetism

Autor: Kübler, Jürgen

Precio: \$2587.00

Editorial:

Año: 2000

Tema:

Edición: 1^a

Sinopsis

ISBN: 9780198500285

This book is an application of quantum mechanics and statistical mechanics to the field of magnetism. A large part of the book is devoted to a detailed treatment of the connections between electronic properties and magnetism, and how they differ in the various known magnetic systems. Current trends are exposed and explained for a large class of alloys and compounds. The modern field of artificially layered systems - known as multilayers - and their industrial applications are dealt with in detail. The book also relates the rich thermodynamic properties of magnets to the ab initio results originating from the electronic structure.
