Sinopsis

ISBN: 9780313330582

Adult/High School-A comprehensive resource covering the artists as well as various topics relevant to the culture. The insightful historical introduction will help readers understand the separate elements embraced by rap and hip-hop: the verbal (MCing), and the musical (DJing), break dancing, and aerosol painting. The alphabetical entries cover all these elements and include most of the well-known rap artists and groups, along with some less-familiar names. The articles also acknowledge some of rap's detractors. Average-quality, black-and-white photos are scattered throughout. The author's cross-references are especially helpful and the index will lead readers to information about individual artists beyond their main entry. The appendixes contain a selected discography and statements regarding the appreciation and preservation of hip-hop culture, including the Hip Hop Declaration of Peace.
