Sinopsis

ISBN: 9781599040639

The fields of artificial intelligence, intelligence control, and intelligent systems are constantly changing. Semiotics and Intelligent Systems Development assembles semiotics and artificial intelligence techniques in order to design new kinds of intelligence systems. An evolutionary publication, Semiotics and Intelligent Systems Development forever changes the research field of artificial intelligence by incorporating the study of meaning processes (semiosis), from the perspective of formal sciences, linguistics, and philosophy.
