**Título:** Targeted Therapies In Oncology

**Autor:** Giaccone / Soria

**Precio:** \$2200.00

**Editorial:**

**Año:** 2007

**Tema:**

**Edición:** 1<sup>a</sup>

**Sinopsis**

**ISBN:** 9780849393716

Targeted therapy is one of the most burgeoning areas of development in cancer research. Increasing knowledge in tumor formation and growth at the molecular level has generated a broad array of therapeutic options, including signal transduction inhibition, anti-angiogenic and anti-vascular agents, cell cycle inhibitors, telomerase and telomere interacting agents, apoptosis inducers, and anti-invasive agents. This book presents an authoritative overview of existing molecular targeted therapies, their relevance and role for specific tumors, and their clinical efficacy and impact on patient treatment.
