Sinopsis

ISBN: 9780071105972

With each edition, general, organic, and biochemistry by Denniston, Topping, and Caret is becoming a favorite among faculty and students alike. the text contains a clear approach to solving problems, dynamic visuals, health and life related applications, and additional pedagogical elements to help direct the student. all of these qualities make general, organic, and biochemistry the centerpiece for any allied health chemistry course. the 5th edition is accompanied by a digital content manager, computerized test bank software and course management systems: pageout, webct, and blackboard. aris complements the text, and provides instructors and students alike with an abundance of online resources.
