Sinopsis

ISBN: 9780262240505

What is a self? Does it exist in reality or is it a mere social construct- or is it perhaps a neurologically induced illusion? The legitimacy of the concept of the self has been questioned by both neuroscientists and philosophers in recent years.

Countering this, in Subjectivity and selfhood, Dan Zahavi argues that the notion of self is crucial for a proper understanding of consciousness.

He investigates the interrelationships that none of these three notions can be understood in isolation.
