**Tema:**

**Edición:** 1ª

**Sinopsis**

**ISBN:** 9781580930512

This is a truly unique book breaking down as it does buildings by colonial nation. It enables a side-by-side comparison of how different countries adapted their historic architectural styles to their mostly tropical colonies. It is stunningly illustrated and is a must-have for anyone interested in colonial architecture or, like my self, wishing to build a luxury home with colonial elegance in the tropics.
