Sinopsis

ISBN: 9780804753319

This is the Center for Effective Organizations's (CEO's) fourth national study of the human resources (HR) function in large corporations, and the only long-term national study of this important function. While measuring whether the HR function is changing, gauging its effectiveness, and focusing particularly on whether it is changing to become an effective strategic partner, this study also analyzes how organizations can more effectively manage their human capital.
