Título: Computer Solutions In Physics. With Applications In Astrophysics

Autor: Van Wyk Steve Precio: \$623.00

Editorial: Año: 2008

Tema: Edición: 1ª

**Sinopsis ISBN:** 9789812774996

With the great progress in numerical methods and the speed of the modern personal computer, if you can formulate the correct physics equations, then you only need to program a few lines of code to get the answer. Where other books on computational physics dwell on the theory of problems, this book takes a detailed look at how to set up the equations and actually solve them on a PC.

Focusing on popular software packages like Mathematica, Maple and MatLab, the book offers undergraduate student a comprehensive treatment of the methodology used in programing solutions to equations in physics.
