Sinopsis

ISBN: 9780792338772

A biotechnology response to environmental issues presenting 66 selected research and review papers written by scientists from 20 countries and originally presented at the International Symposium on Environmental Biotechnology, University of Waterloo, Ontario, Canada, July, 1994. The discussions identify biohazards, bioremediation techniques, and related issues of sustainable development within the areas of genetics and ecology, biodegradation processes, wastewater biotreatment, anaerobic bioprocessing, biomonitoring and biosensors, and government policy.
