Título: Differential Equations With Applications And Historical Notes

Autor: Simmons George F.

Precio: \$645.00

Editorial:

Año: 1972

Tema:

Edición: 2ª

Sinopsis

ISBN: 9780071128070

Presents a revised text distinguished by the exceptional prose and historical/mathematical context. This Second Edition includes expanded coverage of Laplace transforms and partial differential equations, as well as a chapter on numerical methods.

This is a revision of a much-admired text, distinguished by the exceptional prose and historical/mathematical context that have made Simmons' books classics. The Second Edition includes expanded coverage of Laplace transforms and partial differential equations, as well as a new chapter on numerical methods.
