Sinopsis

ISBN: 9780387746401

Due to the author's correspondence with Van der Waerden, Erdős, Baudet, members of the Schur Circle, and others, and due to voluminous archival materials uncovered by the author over 18 years of his work on the book, this book contains material that has never before been published. Historians of mathematics will find much new information, along with old errors corrected and published here for the first time in book form.
