Título: What Is Life? Scientific Approaches And Philosophical Positions

Autor: Durr H. P. / Popp F. A. / Schommers W

Precio: \$1131.00

Editorial:

Año: 2002

Tema:

Edición: 1ª

Sinopsis

ISBN: 9789810247409

The book of Erwin Schrödinger about life evokes a variety of basic questions concerning the understanding of life in terms of modern physics rather than biochemistry. Problems of organization and regulation of biological systems cannot be understood by revealing only the chemical processes of the living state. A group of reputable physicists - among them the followers of Heisenberg and Fröhlich - and biologists came to this same conclusion through several workshops on this topic. This book contains their contributions, written from different viewpoints of theoretical physics and modern biology. These articles are valuable not only for understanding life, but also for creating new and non-invasive diagnostic and therapeutic tools in medicine; they also contribute importantly to a deeper understanding of evolutionary processes, including the development of consciousness.
