Sinopsis

ISBN: 9781599048536

The Handbook of Research on Fuzzy Information Processing in Databases provides comprehensive coverage and definitions of the most important issues, concepts, trends, and technologies in fuzzy topics applied to databases, discussing current investigation into uncertainty and imprecision management by means of fuzzy sets and fuzzy logic in the field of databases and data mining. Through 34 authoritative contributions by over 75 of the world's leading experts, the Handbook of Research on Fuzzy Information Processing in Databases offers researchers, students, and organizations a complete, practical, guide to fuzzy information processing in databases.
