Sinopsis

ISBN: 9780787955663

New and longstanding threats to public health, such as violence, drug misuse, HIV/AIDS, and homelessness are creating an ever greater demand for innovative theories that are responsive to the changes in the larger social environment. This important work is designed to fill the demand by assembling a careful selection of new and emerging health promotion theories into a single volume, written with an emphasis on practical application of theory to health promotion and health education programs.
