**Título:** Current Topics In Computational Molecular Biology

**Autor:** Jiang Tao

**Precio:** \$1015.00

**Editorial:**

**Año:** 2002

**Tema:**

**Edición:** 1<sup>a</sup>

**Sinopsis**

**ISBN:** 0262100924

Computational molecular biology, or bioinformatics, draws on the disciplines of biology, mathematics, statistics, physics, chemistry, computer science, and engineering. It provides the computational support for functional genomics, which links the behavior of cells, organisms, and populations to the information encoded in the genomes, as well as for structural genomics.
