**Título:** Partial Inner Product Spaces

**Autor:** Antoine Jean-Pierre/ Trapani Camillo

**Precio:** \$1152.00

**Editorial:**

**Año:** 2010

**Tema:**

**Edición:** 1ª

**Sinopsis**

**ISBN:** 9783642051357

Partial Inner Product (PIP) Spaces are ubiquitous, e.g. Rigged Hilbert spaces, chains of Hilbert or Banach spaces (such as the Lebesgue spaces  $L_p$  over the real line), etc. In fact, most functional spaces used in (quantum) physics and in signal processing are of this type. The book contains a systematic analysis of PIP spaces and operators defined on them. Numerous examples are described in detail and a large bibliography is provided. Finally, the last chapters cover the many applications of PIP spaces in physics and in signal/image processing, respectively.

As such, the book will be useful both for researchers in mathematics and practitioners of these disciplines.
