Sinopsis

ISBN: 9780821847459

This book contains the proceedings of the research conference, "Imaging Microstructures: Mathematical and Computational Challenges", held at the Institut Henri Poincaré, on June 18-20, 2008.

The problems that appear in imaging microstructures pose significant challenges to our community. The methods involved come from a wide range of areas of pure and applied mathematics. The main purpose of this volume is to review the state-of-the-art developments from analytic, numerical, and physics perspectives.
