Sinopsis

ISBN: 9789738789944

The volume represents the proceedings of the International Workshop on Free Probabilities, Operator Spaces, and von Neumann Algebras, held on June 9-16, 2007, in Sibiu, Romania. It contains five original refereed research papers, as well as an innovative survey by Roberto Longo, presenting a remarkable new perspective on the "one particle structure" of conformal field theory.

A publication of the Theta Foundation. Distributed worldwide, except in Romania, by the AMS.

Table of Contents

S. T. Belinschi -- C-free convolution for measures with unbounded support

P. Boivin and J. Renault -- A Hausdorff-Young inequality for measured groupoids

F. Fidaleo -- New results in noncommutative ergodic theory

R. Longo -- Real Hilbert subspaces, modular theory, $SL(2, \mathbb{R})$ and CFT

F. Radulescu -- A non-commutative, analytic version of Hilbert's 17th problem in type II₁ von Neumann algebras

S. Sakai -- Recent topics on C^{*}-algebras (consistency and independency) and Kadison-Singer problem
