Título: Lewins Genes X

Autor: Krebs Jocelyn E/ Goldstein Elliot S/ Kilpatrick Stephen

Precio: \$700.00

Editorial:

Año: 2009

Tema:

Edición: 10ª

Sinopsis

ISBN: 9780763779924

The field of molecular biology and molecular genetics is rapidly changing with new data acquired daily and new insights into well-studied processes presented on a scale of weeks or months rather than years. For decades Lewin's GENES has provided the teaching community with the most cutting edge presentation of molecular biology and molecular genetics, covering gene structure, sequencing, organization, and expression. The latest edition, with a knowledgeable new author team, has enlisted 21 scientists to provide revisions and content updates in their individual fields of expertise, ensuring that Lewin's GENES X is the most current and comprehensive text in the field. Informative new chapters, as well as a reorganization of material, provide a more logical flow of topics and many chapters have been renamed to better indicate their contents. Lewin's GENES X also contains new pedagogical features to help students learn as they read and an online student study guide allows students to test themselves on key material.
