**Título:** Vibrational Spectroscopy With Neutrons. With Applications In Chemistry, Biology,

**Autor:** Mitchell, Pch/ Parker, Sf/ Ramirez-Cuesta, Aj/ Tomkinson, J

**Precio:** \$2184.00

**Editorial:**

**Año:** 2005

**Tema:**

**Edición:** 1<sup>a</sup>

**Sinopsis**

**ISBN:** 9789812560131

Inelastic neutron scattering (INS) is a spectroscopic technique in which neutrons are used to probe the dynamics of atoms and molecules in solids and liquids. This book is the first, since the late 1960s, to cover the principles and applications of INS as a vibrational-spectroscopic technique. It provides a hands-on account of the use of INS, concentrating on how neutron vibrational spectroscopy can be employed to obtain chemical information on a range of materials that are of interest to chemists, biologists, materials scientists, surface scientists and catalyst researchers. This is an accessible and comprehensive single-volume primary text and reference source.

Contents:

The Theory of Inelastic Neutron Scattering Spectroscopy  
Instrumentation and Experimental Methods  
Interpretation and Analysis of Spectra Using Molecular Modelling  
Analysis of INS Spectra  
Dihydrogen and Hydrides  
Surface Chemistry and Catalysis  
Organic and Organometallic Compounds  
Hydrogen Bonding  
Soft Condensed Matter \_ Polymers and Biomaterials  
Non-Hydrogenous Materials and Carbon  
Vibrational Spectroscopy with Neutrons \_ The Future
